Our Goal

The main goal is to assist freshly graduated teachers or anyone interested in the field of education in finding professional jobs. To achieve this objective, we have decided to create a website consisting of two main sections.

Section 1: Quiz Download with Solutions for Teachers

This section allows teachers (customers) to download quizzes along with their solutions.

Section 2: Preparation Session Download

This section allows customers to download preparation sessions.

Both these services require an annual fee.

What is the Idea?

The idea is to create a website (system) that can help beginner teachers, educational centers, and new graduate students.

Details on our project

Name of project :

support teacher ST

Construction of website:

1 home ➡ 2 customer profile ➡ 3 subjects ➡ 4 trainings ➡ 5 contact us

                3a exercices with solutions (empty)

                3b Lesson preparation (empty)

                3c Automatic system

Remarks:

- This project should be flexible in English, arabic and French
- Process steps :

 Registration Step:

In this step, the customers should fill out some questions such as

1 name

2 last name

3 your email

4 your phone number

5 What is the language of instruction?

6 What is the subject of instruction?

7 What is the grade level that you teach?

Filtrage step : according to the answer the system show to customers what they need i mean for intance Subject and grade level

Free items: there is some quizzes free to download

When select multiple iltems the system show the amount of money they should pay to get it

Technical informations

- ➢ We need one super admin and one admin However i can make admin as super admin.
- ➢ We need to know by graphs : the numbers of teachers visitor our project

  The numbers of Really clients

  The languages who is selected and the subjects

- ➢ The files can be in PDF, powerpoint and pictures (quality advice) and available for any devices
- ➢ In part financial we need some times to give you more details
- ➢ System security, in case there is a problem what we should do ?
- ➢ In part training (advice)
- ➢ Create a logo for our project (Support teachers ST)
- ➢ Design be clear and simple to use either on laptop or phone
